

PAIWI NI BRO PROGRAM

ACCOMPLISHMENT REPORT 2018

I. OVERVIEW

Paiwi ni BRO Program is one of the 13-components of the Bojie-Rodito Opportunities Program. It primarily initiates the province's livestock production and establishment of a more sustainable facility in this sector either it be on a backyard or farm-based. The program points to production vis-a-vis the income generation of a small farm family which is expected to develop into a small industry.

The small farm family is given the opportunity to avail of a livestock-swine (breeding or fattening), chicks, or buck – dispersal which shall be repaid with its same kind in an agreed time frame and in turn be re-dispersed to other small farm families in the community.

If swine is the preferred stock, the recipient is being provided with an animal feeds assistance that the BRO-FAP Office refers as the BRO Livelihood component. It is a P3,000.00 interest-free financial capital to procure animal feeds and it will pass-on to other program beneficiaries together with the stock.

For chicks, one (1) must give back 10 of its kind after eight months while a buck must be repaid with 2 kids in a span of 2 years.

II. GOALS/OBJECTIVES

1. As earlier written, the program pursues to provide livestock for production and income generation.
2. It aims to establish a farm-based venture which can increase scanty production and profits for the small farmer family.
3. By providing interest-free financial capital, the beneficiary skips the lending field which imposes usurious interest rates.

TOTAL			P3,110,700.00

Total Repayment (2018 Release)

P23,000.00

IV. IMPACT

For a beneficiary to avoid entering an interest-bearing borrowing agreement, the program infuses savings indirectly felt or realized – that when skipping to pay an interest the same would convert into savings. The savings would surmount the need for a financial investor or the worry of the difficulty to find a financier.

With the PGI as the financial source and practicing the dispersal scheme, the beneficiary's earnings upturns more than the average through the Paiwi ni BRO program.

On the economic side, there will become more beneficiaries that could gear-up their living standard experiencing Paiwi ni BRO Program into the livestock playing field.

V. SUSTAINABILITY

The Provincial Government of Isabela stands high as it provides a yearly budget allocation of P8,500,000.00 to these twin Programs – Paiwi ni BRO and BRO Livelihood Component. All the 13 Component BRO Farmer Assistance Programs have been institutionalized thus, sustainability is achieved.
